

# Top 10 Reasons to Use Atalasoftware's HTML5 Viewer!

Since 2000 Atalasoftware has been providing high performance imaging libraries to help software developers build document capture, viewing, scanning, and processing applications. Backed by remarkable customer service we specialize in zero-footprint technologies allowing applications to be simple to use and 100% web-based. Some add-ons may be required.

Atalasoftware's HTML5 zero-footprint WebDocumentViewer allows document interaction within a web browser. This eBook discusses some of the top reasons why you should consider Atalasoftware for your project. We think our viewer is pretty great, here's why:

## 10. Easy to get started

Getting started with Atalasoftware is very easy – you just need to [create an account](#) on our website and download the software – that's it! The free evaluation is 30 days and if you need an extension beyond 30 days, just let us know. You also have full technical support during your evaluation – we don't limit the number of questions you can ask or the number of Support Cases that you can open. Our goal is to make sure our SDKs will work for you and help make your project a huge success!

We are here to help in any way we can. If you have any questions feel free to open a [Support Case](#) or e-mail our sales team [sales@atalasoftware.com](mailto:sales@atalasoftware.com)

**FREE 30 DAY EVALUATION WITH FULL SUPPORT**

## 9. Supports PDF and Other Formats

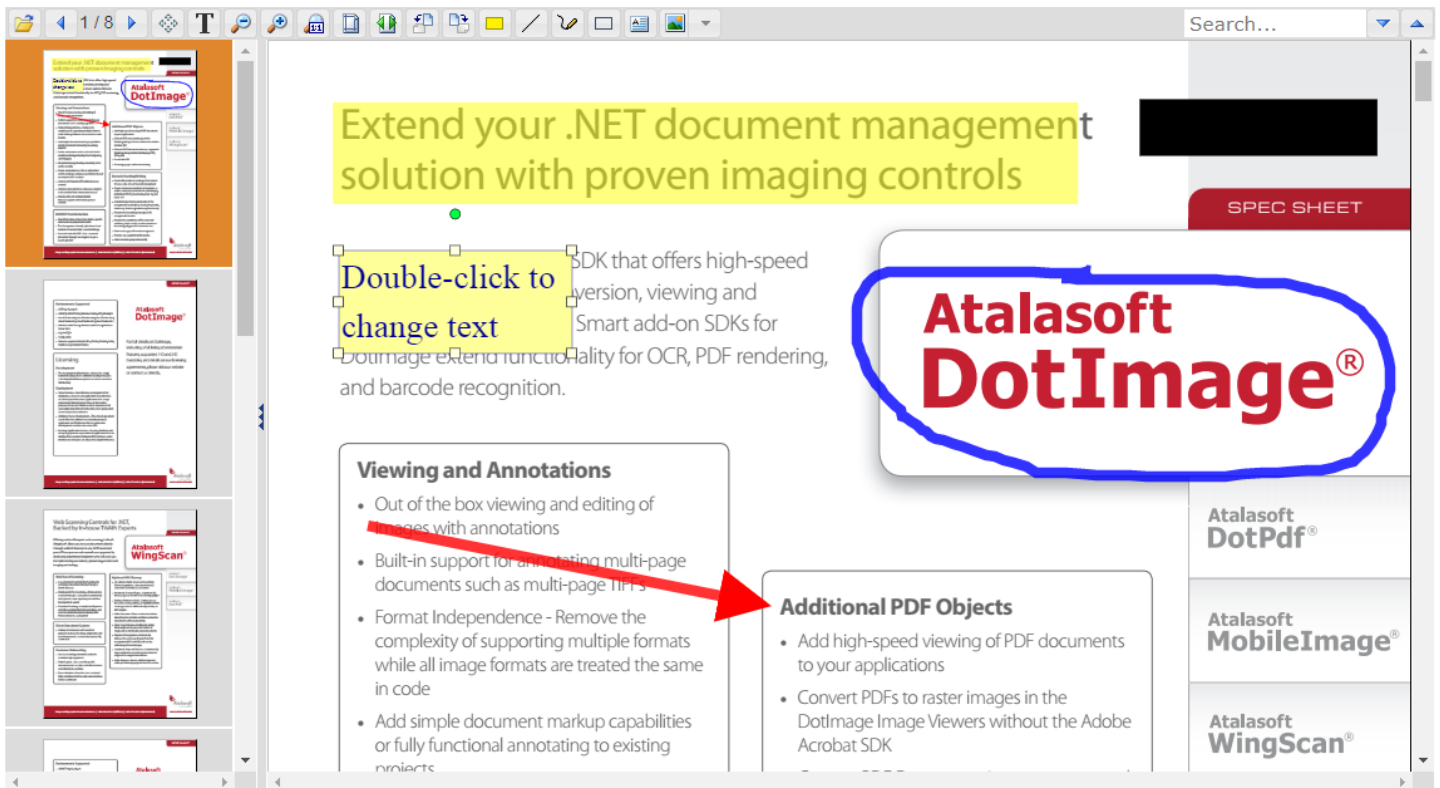

Atalasoft supports PDF and many other formats that are not web native. Our viewer live-converts image formats into formats viewable in HTML5. From CAD to DICOM to RAW to Word, Excel, and PowerPoint, we can easily display any image in our viewer, without additional code.

## 8. All the pieces you need

A screenshot of a web browser displaying the Atalasoft DotImage product page. The page features a navigation menu on the left with items like "Extend your .NET document management solution with proven imaging controls", "Atalasoft DotImage", "Atalasoft DotPdf", "Atalasoft MobileImage", and "Atalasoft WingScan". The main content area has a heading "Extend your .NET document management solution with proven imaging controls" and a sub-heading "SPEC SHEET". Below this is a large red "Atalasoft DotImage®" logo. The page also includes a "Viewing and Annotations" section with a list of features: "Out of the box viewing and editing of images with annotations", "Built-in support for annotating multi-page documents such as multi-page TIFFs", "Format Independence - Remove the complexity of supporting multiple formats while all image formats are treated the same in code", and "Add simple document markup capabilities or fully functional annotating to existing projects". There is also an "Additional PDF Objects" section with a list of features: "Add high-speed viewing of PDF documents to your applications" and "Convert PDFs to raster images in the DotImage Image Viewers without the Adobe Acrobat SDK".

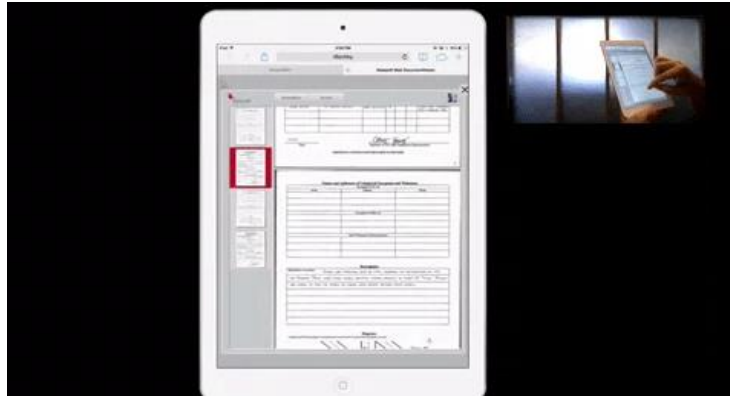

Our HTML5 WebDocumentViewer comes ready to display all of your documents. In Addition to giving you the ability to quickly scroll through pages, our thumbnail viewer allows for pages to be rearranged and documents to be appended. The document toolbar adds the ability to open, resize, zoom in/out and more. Our annotation toolbar can easily be added to give you quick access to the annotation features you need. And the best part - They are fully customizable!

## 7. Speaking of Annotations

Atalsoft's viewer has annotation support built right in - Just set the config option annotations to true. We maintain 8 out of the box annotation types, including text, freehand and rectangle. This enables many different kinds of document interaction, natively and in-browser, and only requires the config property: allowAnnotations: true,

## 6. Touch Support

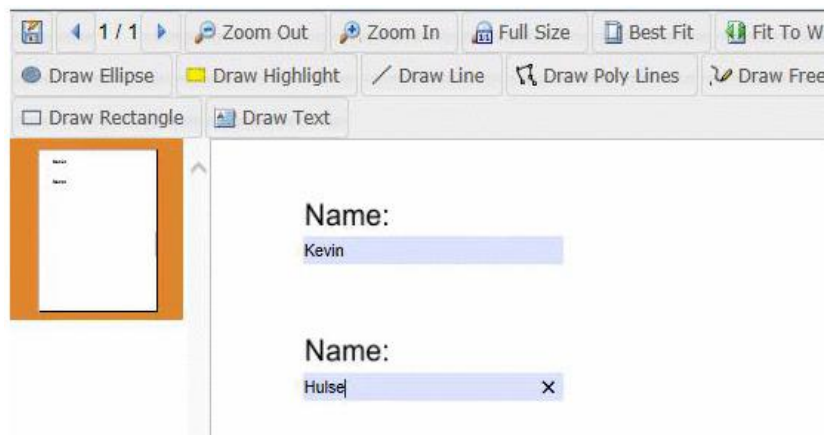

It is likely that you will need to view images both on your computer and on mobile devices. Being able to use the same viewer in both situations is a huge plus. We have structured our viewer to comply with the standards set forth by Apple and Google, automatically without additional code.

## 5. Data Security

Form <b>W-9</b> (Rev. December 2014) Department of the Treasury Internal Revenue Service	Opened by: Administrator	<b>Request for Taxpayer Identification Number and Certification</b>	Give Form to the requester. Do not send to the IRS.
Print or type see Specific instructions on page 2.	1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank. AI Taysoft		
	2 Business name/disregarded entity name, if different from above		
	3 Check appropriate box for federal tax classification; check only one of the following seven boxes: <input checked="" type="checkbox"/> Individual/sole proprietor or single-member LLC <input type="checkbox"/> C Corporation <input type="checkbox"/> S Corporation <input type="checkbox"/> Partnership <input type="checkbox"/> Trust/estate <input type="checkbox"/> Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶ C <b>Note.</b> For a single-member LLC that is disregarded, do not check LLC; check the appropriate box in the line above for the tax classification of the single-member owner. <input type="checkbox"/> Other (see instructions) ▶		4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3): Exempt payee code (if any) 2 Exemption from FATCA reporting code (if any) (Applies to accounts maintained outside the U.S.)
	5 Address (number, street, and apt. or suite no.) 116 Pleasant Street Suite 321B		Requester's name and address (optional)
	6 City, state, and ZIP code Easthampton MA		
	7 List account number(s) here (optional)		
	<b>Part I Taxpayer Identification Number (TIN)</b> Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see <i>How to get a TIN</i> on page 3. <b>Note.</b> If the account is in more than one name, see the instructions for line 1 and the chart on page 4 for guidelines on whose number to enter.		
Social security number		Employer identification number	

Because the images are being rendered in real time on the server, it's possible to protect data and leave breadcrumbs as to who accessed and saved the data in the event of a leak. Auto redaction can be performed intelligently based on the user's permissions on the server before reaching the user, hiding the data that they shouldn't have access to. Atalasoftware provides the tools to add these custom data security functionalities easily.

## 4. In Browser PDF Form Fill

Want to present interactive documents where data can be saved to a unique PDF? A single configuration option is all that needs to be turned on to add fields to a document. The hard part is all handled and if a custom workflow needs to be kicked off, the server has events connecting user action to your backend process. Enabling this is as simple as setting a configuration property of the viewer.

## 3. Huge Document Support

Not all documents are created equal - Some are massive juggernauts. Take Moby Dick for example, its 861 pages! Our viewer can handle it. We dynamically load pages where the viewer is focused to reduce load times and prevent in browser memory crashes. This makes a huge difference and you don't need to add any code.

## 2. Everything you need, and growing all the time

Our WebDocumentViewer is prepared to address whatever needs you have - and features are added all the time. Some of the highlights include:

- HTML5 zero-footprint in browser viewing
- Integrated annotations (including burning) with image clean up
- Easy to implement, fast loading, and fully customizable to fit your needs
- Major formats supported include PDF, TIFF, Office and more
- Searching and highlighting text on searchable documents
- Twain Scanning
- File format conversions

Additional products; more reasons to consider Atalasoftware:

- WingScan: Web based in browser scanning with optional VRS clean-up
- MobileImage: Mobile capture and clean up for iOS and Android
- OCR Engines and Searchable PDF Creation
- Barcode Reading and Writing

And of course, the most important reason to choose the WebDocumentViewer:

# 1. Atalasoftware's Amazing Support Team!

Our support team ROCKS and we mean that! They will help accelerate the implementation of your custom viewer and reduce your learning curve. They are experienced software engineers that speak your language and can help get your document-centric apps looking sharp and working the way you like. Whether you prefer talking on the phone or using our case management portal, they will help you quickly, happily, and effectively.

Another consideration that comes up frequently is cost and how products are licensed. We offer transparent pricing information and a [Licensing Overview](#) page right on our website. If you have:

- A small deployment
- Expecting to scale to higher volumes
- Have an already deployed application
- Or need to switch vendors for whatever reason

We want to work with you on an agreement that makes sense. Thank you very much for considering Atalasoftware for your project. Our goal is to make sure our SDKs will work for you and help make your project a huge success!

We are here to help in any way we can. If you have any questions feel free to open a [Support Case](#) or e-mail our sales team [sales@atalasoftware.com](mailto:sales@atalasoftware.com)
