

INFO: NuGet Support for DotImage

Starting with 10.6.1.8, DotImage now has NuGet package support.

You can visit our [NuGet Archive page](#) to see all of the modules we support.

Minimum Requirements

Any application that uses DotImage will require our Atalasoft.Shared.dll to be referenced, you can install this using

```
PM> Install-Package Atalasoft.Shared
```

In addition, nearly every Atalasoft-based project except possibly a pure WingScan or DotPdf based project will require the main DotImage module (Atalasoft.dotImage.dll) in either x86 or x64 depending on the "bitness" of your target application

```
PM> Install-Package Atalasoft.dotImage.x86
```

or

```
PM> Install-Package Atalasoft.dotImage.x64
```

Also, nearly every project using DotImage will require a reference to Atalasoft.dotImage.Lib.dll

```
PM>Install-Package Atalasoft.dotImage.Lib.x86
```

or

```
PM>Install-Package Atalasoft.dotImage.Lib.x64
```

FULL MATRIX

Assembly	x86 PM Command (for x64, replace "x86" with "x64")	Notes
Atalasoft.Shared.dll	PM> Install-Package	No x86/x64 ... required for

INFO: NuGet Support for DotImage

	Atalasoft.Shared	all DotImage projects
Atalasoft.dotImage.dll	PM> Install-Package Atalasoft.dotImage.x86	Base SDK - Nearly all DotImage projects will need to reference this
Atalasoft.dotImage.Lib.dll	PM>Install-Package Atalasoft.dotImage.Lib.x86	Image Commands Nearly all DotImage projects will need to reference this
