

HOWTO: Use Dicom Images with DotImage

Dicom is an add-on for DotImage (now included with DotImage Document Imaging, though the article still applies for adding the decoder) The add-on provides the ability to open old and new style DICOM formats. To add Dicom decoding to DotImage's Open() methods register the DicomDecoder:

C#

```
tatic ClassName() { RegisteredDecoders.Decoders.Add(new DicomDecoder()); }
```

VB.NET

```
Shared Sub New() RegisteredDecoders.Decoders.Add(New DicomDecoder()) End Sub
```

You may find our [DicomLeveling](#) and/or [DicomViewer](#) sample apps helpful.
