Background

To accommodate our customers that are supporting older applications we have made available a license that will make a COM callable wrapper possible. While Atalasoft does not support this function we will make available the license that makes this possible. To get the license you need for this please contact our sales team at Atalasoft they can be reached via email at sales@atalasoft.com.

Here are some links that explain how to create a COM callable wrapper. We hope that this can clarify any questions that you may have on this matter. Again Atalasoft will not support any issues with COM applications. We're a .NET SDK and will support our API . We only make the special COM Callable License available.. integration with COM is entirely your responsibility.
