INFO: jQuery and jQueryUI Versions used in DotImage

Applicability

Applies to: DotImage 10.0.0 through 2026.2.5 (WebDocumentViewer resources, `WebResources\WebDocViewer`)

Background

The jQuery and jQuery UI file names include the version number. When you upgrade DotImage, the new files have different names from the old ones, so copying the new WebResources over an existing folder leaves the old files beside the new ones. Any page, script bundle or configuration that points to a library by file name keeps pointing to the old version until you change it.

The major version of jQuery changed from 1.x to 3.x between DotImage 11.0.0.11 and 11.1.0.0. Code that you wrote against jQuery 1.x, such as custom scripts that run on the same page as the viewer, may need review when you move across that boundary.

The library versions can also matter outside the viewer. Security scans and audits of a web application commonly report on the versions of the client side libraries it includes, and the tables on this page show which version a given DotImage build contains.

Summary

The Atalasoft WebDocumentViewer ships with its own copies of the jQuery and jQuery UI libraries in the `WebResources\WebDocViewer` folder. The version of each library is part of the file name, for example `jquery-3.5.1.min.js` and `jquery-ui-1.14.0.min.js`. The bundled versions have changed several times over the life of the product, and not every DotImage release changed them.

Across the 131 DotImage builds in our archive that include these files, jQuery moved through 6 versions and jQuery UI through 5. Use the table below to find the versions that ship with your DotImage build.

Current versions

INFO: jQuery and jQueryUI Versions used in DotImage

DotImage 2026.2.5 ships jQuery 3.5.1 and jQuery UI 1.14.0.

jQuery and jQuery UI version by DotImage build

Listed in release order. "Builds" counts the DotImage builds that ship that combination. The full build-by-build list is in the appendix.

#	jQuery	jQuery UI	jquery.easing plugin	DotImage builds that ship it	Builds
1	1.6.1	1.8.14	1.3	10.0.0 through 10.0.6	7
2	1.7.1	1.8.14	1.3	10.0.7, 10.2.x through 10.7.x, 11.0.0.0	52
3	1.11.0	1.10.4	1.3	11.0.0.1 through 11.0.0.11	11
4	3.3.1	1.12.1	not shipped	11.1.0.0 through 11.1.0.7	8
5	3.4.1	1.12.1	not shipped	11.2.0.0 through 11.2.0.3	4
6	3.5.1	1.12.1	not shipped	11.2.0.4 through 11.3.0.2	13
7	3.5.1	1.13.1	not shipped	11.3.0.3 through 11.5.0.4	23
8	3.5.1	1.14.0	not shipped	11.5.0.5 through 2026.2.5	13

Where each library changed

INFO: jQuery and jQueryUI Versions used in DotImage

Library	Change	Last build with the old version	First build with the new version
jQuery	1.6.1 to 1.7.1	10.0.6	10.0.7
jQuery	1.7.1 to 1.11.0	11.0.0.0	11.0.0.1
jQuery	1.11.0 to 3.3.1	11.0.0.11	11.1.0.0
jQuery	3.3.1 to 3.4.1	11.1.0.7	11.2.0.0
jQuery	3.4.1 to 3.5.1	11.2.0.3	11.2.0.4
jQuery UI	1.8.14 to 1.10.4	11.0.0.0	11.0.0.1
jQuery UI	1.10.4 to 1.12.1	11.0.0.11	11.1.0.0
jQuery UI	1.12.1 to 1.13.1	11.3.0.2	11.3.0.3
jQuery UI	1.13.1 to 1.14.0	11.5.0.4	11.5.0.5
jquery.easing plugin	1.3 removed	11.0.0.11	11.1.0.0

Notes

- The first build listed for a new version is the first build in our archive that carries it.
- The jQuery and jQuery UI libraries can change in the middle of a release line, at a feature pack boundary. For example, 11.0.0.0 ships jQuery 1.7.1, and 11.0.0.1 ships jQuery 1.11.0. Look up the exact build, not only the major.minor release.
- The 10.7.0.x and 11.0.0.x releases overlapped in time. All 10.7.0.x builds, including 10.7.0.13, ship jQuery 1.7.1 and jQuery UI 1.8.14. The table is ordered by version label, not ship date.
- jQuery UI is bundled as a matching pair of files, a script and a stylesheet (for example `jquery-ui-1.14.0.min.js` and `jquery-ui-1.14.0.min.css`). Both always carry the same version in a given build.
- The jQuery UI 1.8.14 files are named `jquery-ui-1.8.14.custom.min.js` and `jquery-ui-1.8.14.custom.css`. Later versions drop the `custom` part of the name, and that marks the beginning of when we started shipping pure standard files.

Where the files are located

DotImage version	Folder
10.0.0 through 10.6.1.10	`bin\2.0\x86\WebResources\WebDocViewer` and `bin\2.0\x64\WebResources\WebDocViewer`
10.7.0.0 and later	`bin\WebResources\WebDocViewer`

The DotImage 4.0, 6.0, 7.0, 8.0 and 9.0.x builds in our archive contain no jQuery files in

this folder.

How to find the versions in your solution

The version is in the file name. From PowerShell, list the jQuery files that your application deploys for the viewer:

```
Get-ChildItem -Path '.\MyApp' -Recurse -Include 'jquery*.js', 'jquery*.css' | Where-Object { $_.FullName -match 'WebDocViewer' } | Select-Object FullName
```

The same listing helps find stray copies of an older version left behind by an earlier upgrade.

Migration checklist

As a general rule, when you update to a new version of DotImage, just copy the contents of the WebDocViewer resource folder into the relevant location in your project. If it's the same version, it just has no change but if you do see the version changing, remember you also need to update your HTML where you're linking in the files.

Please see HOWTO: Upgrade / Update DotImage - Including Web Apps Using WebDocumentViewer and/or WebCapture for more information.

Manual double Check

- Look up the jQuery and jQuery UI versions for your current DotImage build and for your target build in the tables on this page.
- If the versions are the same, the library files do not need to change.
- If the versions differ, deploy the full `WebResources\WebDocViewer` folder from the target build instead of copying individual files, so that the viewer scripts and the libraries come from the same build.
- Remove the old versioned jQuery and jQuery UI files from the deployed folder, and from any installer, build output folder or deployment package.
- Update any page, bundle or configuration that references a jQuery or jQuery UI file by name.
- If your application uses the `jquery.easing` plugin that shipped with 11.0.0.11 and earlier, note that it is not part of 11.1.0.0 and later.

- If you move across the jQuery 1.x to 3.x boundary (11.0.0.11 to 11.1.0.0), test any custom scripts that run on the same page as the viewer.
- Test the viewer in the target environment before you release.

Appendix

jQuery and jQuery UI version for every DotImage build

DotImage version is the product version of `Atalasoft.dotImage.dll` for that build.

DotImage version	jQuery	jQuery UI
10.0.0.49402	1.6.1	1.8.14
